

ANNUAL REPORT 2020 – 2021.

The Director's lines.

Year of 2020-21 was full with uncertainty, due to pandemic; in fact all the targets fixed by NGO are fulfilled, but at the same time, we perform, other activities which were not even imagined for this particular time. We could able to access, those people who are in dire need of food and other basic necessities of life, right from the distribution of mask ,sanitizer , medicine ,raw food and other items for poor section of society , counseling of community particularly in rural area , conducted vaccination camps for persons with disability with the health authorities . We are feeling privilege to be medium of serving humanity through these deeds.

From last ten years we are facilitating centre based education to special and normal drop out children in our complex, but in the year, we could not impart this facility due covid-19 restrictions. We tried to plug this gap by new technology of various kinds in use; in fact cases of negative impacts have also been reported with the passage of time. We hope things will be settling down to normalcy and we shall continue with alternative ideas, so that we could compensate the losses during last year.

In last year, we could associate with Jal Jiwan Mission Himachal Pradesh, which is very important issue in the context of society. So far issues related to DIVYANGJAN , we tried our best for their facilities, particularly, we are much satisfied with the counseling and menstrual health of special needs and other general adolescents girls in rural area . in

year to come , our main emphasis will be on quality services imparted by society in last year's .

we deal in Ganpati ,highly sensitive issues in nature. Education and counseling of students who find it difficult to cope up with the stress of issues in Education. High emphasis is given to the girl's education and the counseling is free for all the students, even those who are not enrolled with us. NIOS, IGNOU, PRAGATI PRIVATE ITI and GANPATI FOR DIVYANGJAN all fall under the roof of Ganpati Educational Society. The strength in each department is increasing day by day and our success stories are multiplying.

I thank GOD that we were chosen to do this multifocal job and extending our horizons to complete the said job with dignity and honor. Though history may not recognize Ganpati's role but it is highly satisfying to see that we were not created un-necessarily.

we are committed most of the Ganpati's activities will be handled under one roof that includes a hospital, hostel facilities for Divyangjan to the capacity of 50 to 75 children and adults. We endeavor to deliver multiple activities under this project including skill development programs offered by the Government of India. Working for the Divyangjan will be easier and we can bring positive results in less than half the time than before. We will get the approval in a few days for the land transfer. In the next Annual Report I shall deliver the exact measurements with photographs.

I thank them again for their faith and confidence in our organization. We have been now continuously receiving refreshments from m/s. **CHIROS PHARMESEUTICALS, SOLAN**, for our home based and day care center friends. Due gratitude is also extended to **SARVA SIKSHA ABHIVAN, (SSA); DISTRICT INSTITUTE OF EDUCATIONAL TRAININF (DIET); COMPOSITE RE-HABILITATION CENTER, (CRC)**, and lastly but not the least **THE NATIONAL TRUST, (NT)**, under Ministry of social justice and empowerment ,GOI,**DELHI**, for supporting us in the shape of Day care centre Disha cum Vikas in Kunihar and above all for believing in our work ethics. CSR of Limited companies, Personnel's, and our donor's for the transparency and accuracy we have maintained during the activities of the organization.

I on behalf of GANPATI, thank you all.

Dr. Roshan Lal Sharma, (Director, Ganpati Educational Society.)

INTRODUCTION TO THE ORGANIZATION

Ganpati Educational Society is a not – for -profit, non – political, and a non – religious society registered under societies act XXI/1860 on **04 – 12 – 2003**. Since its incorporation” G.E.S. “ has been working on real grass root levels on issues related to care of disables and disabilities in all its forms in children and adults, education, health and nutrition problems in mother and child, health in general, vocational training for the rural youth, environmental protection , various community development program’s At the moment we are operating in district Solan and its surrounding area’s but and as per the projects demand we also spread our wings to other districts of Himachal Pradesh. Our Registered Office is at Village – Kunihar, Near Telephone Exchange, Tehsil- Arki, District – Solan, Himachal Pradesh-173207.

VISION

We have always maintained **QUALITY AND TRANSPERENCY** for all the services entrusted to us in all our projects executed , and so is the future vision.

MISSION

Our availability to all human kind where our presence is need based.

OBJECTIVES

To work for the rights, equal opportunities, and social justice for persons with disabilities (of all kinds) and to provide education to the handicapped children and enable them to face life with courage, confidence and dignity.

To provide educational infrastructure and facilities in areas of concentration of educationally backward minorities who do not have adequate provisions for elementary / secondary education.

To adopt an area intensive approach for integration of existing efforts to provide formal and non-formal schooling, adult education and upgrading of education through condensed courses and vocational training.

To create environmental awareness among children.

Mobilizing women in small viable groups (SHG) and making facilities available through training and access to credit and also enabling these small groups of women to take up employment – cum – income generating programs of their own.

To provide primary need of shelter, food, clothes and care to the marginalized women /girls living in difficult circumstances and who are without any socio- economic support and to provide emotional support and counseling to such women.

To develop awareness regarding the importance of sports for all round development of an individual.

To inspire youth to set up their own training centers in their respective areas and to create new skills in rural youth through which villages can be self reliant.

To provide facilities for developing rural sports at grass root level.

Encouraging people's participation through community organizations and capacity building program's and to enlarge the scope of vocational and professional opportunities, income generation and gainful occupations.

To create awareness and educating the people about the ill-effects of alcoholism.

To promote national understanding among youth and to arrange activities for the preservation of cultural heritage especially in the rural areas.

To facilitate employment generation through land development and other allied land based and related activities including plantation and also to develop high quality horticulture farms in identified belts and make such area vibrant with horticulture activities which in turn will act as hubs for developing commercial horticulture. In addition conservation of medicinal plants and their sustainable utilization including planting and sowing of multipurpose trees, shrubs and grasses. A forestation of degraded forests and non-forest waste-land will further help in generating economic stability.

Development of biological and other innovations for pollution prevention and control including waste recycling.

To work towards providing improved medical services in rural areas.

To undertake research and evaluation studies in the field of consumer welfare and to identify practical problems faced by the consumer.

Meetings:

In the first week of every month one General Body Meeting and one Annual General Meeting in April is held to define new strategies and projects.

Brief Activities in the year 2020- 2021.

ACTIVITY NO 1.

Project Name: Home Based Education Program for Children with Special Needs.

Project Area : Arki, Djharampur and Kandaghat blocks.

No. of Beneficiaries: 20

No. of Beneficiaries funded by smile donors: 7

No. of Beneficiaries funded by SSA: 05

Funding Agency : SMILE DONORS (California) USA. Sarva Shiksha Ahhiyan (SSA)

Due to pandemic this year right from the beginning of the year, it was not possible to visit the children home for some months, but after the lock down is over probably in the month of Oct. 2020, our staff gave services to children, with the guidelines suggested by local administration. During this period, we are providing distribution of mask, sanitizer, medicine, raw food, sanitary pads to adolescence girls and other items to the children. The present Home –

Based Education program for CWSN's is being successfully run by our organization from the past **fifteen** years in the above mentioned blocks of district Solan in Himachal Pradesh with the courtesy of **SMILE DONORS**, California, USA and **Sarva Siksha Abhiyan**. Our Special Educators have 6-8 special children each to be visited at their residences on a regular basis and on each visit the children receive refreshments supplied to us by the courtesy of **Chiros Pharma**, Solan. The following tasks are undertaken during home visits:

Each special child is different in terms of learning, behavior, grasping, self-hygiene, attitude, understanding and self-coordination therefore our educators have a separate schedule for all the children they attend to. Each day the activity has to be different so that the child gets used to and open to all the necessary skills which are being taught to him/her.

Academics Skills are taught to the extent that the child can read/write counting, alphabets, his/her name, recognize the colors, currency notes identification and very minor addition and subtraction. Now because these skills do not come naturally to the child, so some of the skills are to be repeated on a daily basis. Name and addresses of the child concerned are taught to perfection.

Home based activities of children

Social Skills activities are also paid due importance wherein welcoming gestures, bringing water for the guests, to be polite in conversations, sitting with a right postures and saying bye-bye while departing etc. are included. These skills are easy and fun to learn for the child. The children enjoy learning them.

Domestic Skills are about necessities to be accomplished during a routine days work and they are equally important wherein the household names of things are recited on all meetings so that the child is helpful doing household work. In most of the cases the child now helps the parents in booming the house, fetching water from a nearby source, cleaning the utensils, working in the fields etc. Watering and how to maintain the small kitchen garden is what additionally we have taken up in 2018-19.

Domestic activities by children under the supervision of parents

Vocational Skills are taught to only those special children who show keen interest for a particular type of skill such as painting, gardening, basket/paper bags/candle making etc. All the children are given at least two chances for one vocational skill to pick up. If they do so they take advanced training but if they do not show any interest, they take up the next skill on a trial basis.

Self- Help or **personal grooming skills** such as toilet training, bathing, brushing, eating, wearing dress and shoes are also part of the education so that the child becomes self-reliant in handling daily issues, besides the house hold members do not find sufficient time to always be with the child. Once the special friend learns this he/she saves a lot of botheration for other members of the house.

parents counselling by care giver along with cwsn and other adlosence girls.

As all the children enrolled with us get the benefit of seeing the physiotherapist, our special educators learn the exercises to be given to our friends at home and the same is taught to their parents/guardians so that the exercises are maintained in regularity. Each child/ adult has a different set of exercises

One thing importantly stressed is this that there is no time bound activity with our special friends. It may take months for a child to develop a particular skill and then again he/she have chances to forget the same in a couple of days. The skill development tapings have to be regular and uninterrupted for satisfying results. We have seen miracles happening either way. Sometimes the expected element is not performed and on many occasions the less taught skill is performed in accuracy.

ACTIVITY NO 2.

Project Name : Disha cum Vikas day care center.

Project Area : Village – Kuniha, distt. solan

No. of Beneficiaries: 29

No. of beneficiaries funded: 10

Funding Agency : National Trust under Min. of Social Justice & Empowerment
Govt.Of India.

This activity was initiated in the year 2008 under National Trust under the scheme aspiration centre but later on in 2013 due to paucity of funds, it could not be continued further; rays of hope again realized when national trust lunch new schemes in 2015 . In this program those CWSN's who belong to nearby villages and can come to the educational center along with their parents. It becomes more convenient to pay individual attention along with some kind of group activity. Our special educators are prompted to prepare their

own teaching learning material. Sizes of the models are kept big for easy discrimination; readymade models are purchased for difficult models. Other writing material is given to the children for home exercises. Ten children (age group 0 – 10 years) along with their parents gather at our day care and perform the following activities.

due to pandemic and then after lock down after march 2020 we have to impart day care centre services by alternative mode of knowledge and skill transformation with the help of demonstration by teaching learning material through their parents /guardians , whatsapp group has created for children, we give assignments in group according their ability, guardians help them in completion of assignment, then parents /guardians upload these activities on group, our spl. Educators and our whole NGO team check these activities and give appreciation and further direction for improvement. Due to covid -19 spread we are not in position to call the children in centre, but we are visiting child home, following all precautions, suggested by administration time to time. We are trying to bridge the gap, arising due to regular physical absence of child. In situation, where the cases of covid -19 in particular village are existing, we are avoiding, our home visits, in that particular village until zero cases. We are also conducting Google- meet for parents counseling and physiotherapy. We are providing free medicine to the needy children, those who are on regular medicine.

Day care activities in our Disha cum Vikas centre conducted in home due to covid

Visit of the Director VO in homes after short break in lock down in villages

1.a Concept Formation: naming and matching, generalization and similarly identification of colors in daily use.

Cerebral Palsy patients are given special emphasis as they are unable to handle even a spoon or a glass of water. Physiotherapy exercises teach them to perform their motor actions with perfection. They are helped in hand functioning, physical, occupational, speech and language therapies, medical intervention, assistive technology and early education.

Clay Activity, breathing and breezing exercises, neck holding, bowl handling etc are further examples of improving the child's functions. Each child is involved in his/her own capacity and to the extent they can manage.

Every year we celebrate festivals like Holi, Dushera, Depawali, Raksha Bhandan, and Christmas & New Year. DISABILITY Day is observed on the 3rd of December.

This activity was initiated in the year 2016 for those CWSN's who belong to nearby villages and can come to the educational center along with their parents _as it becomes more convenient to pay individual attention along with some kind of group activity. Our special educators are prompted to prepare their own teaching learning material. Sizes of the models are kept big for easy discrimination; readymade models are purchased for difficult models. Other writing material is given to the children for home exercises. Ten to fifteen children (age group above 10 years) along with their parents gather at our day care and, this year, we have to celebrate this activity virtually.

We are performing the following activities:

b. Concept Formation: Money identification, naming and matching, generalization and similarly identification of colors in daily use.

Cerebral Palsy patients are given special emphasis as they are unable to handle even a spoon or a glass of water. The general exercises teach them to perform their motor actions with perfection. They are helped in hand functioning, physical, occupational, speech and language therapies, medical intervention, and assistive technology.

Clay Activity, breathing and breezing exercises, neck holding, bowl handling etc are further examples of improving the child's functions. Each child is involved in his/her own capacity and to the extent they can manage.

Main objective of this program is to train children above ten years of age in vocational and skill attainment for their livelihood, employment, adjustment in society and to fulfill their therapeutic need.

Day care activities in our Disha cum vikas centre (performed in home due to covid-19)

Vocational activities for children in our Disha cum vikas centre (in home environment)

ACTIVITY NO 2.

Physio/Speech/Occupational Therapy. Aids and Appliances.

Our society has made provisions for different kinds of therapies for all the disabilities under National Trust and PWD Act and experts are called in from reputed center's seeing the number of beneficiaries who can attend the session positively. Parents/ guardians of our CWSN friends are given directions for handling and caring of these special children.

Aids and appliances in the shape of shoes, creep bandages, bandages, cotton, white cloth, wheel-chairs, hearing aids, walking sticks, spectacles etc are distributed free of cost every year when we organize a special medical camp. Almost for all the aids and appliance we collaborate with the government and nearby NGO's as most of the appliances are out of our financial reach. in the year under discussion most of the therapeutic needs were full filled virtual under the supervision of parents and guardians .

Physiotherapies in home environment

In the year 2020-21 a total number of (twice a week)_visits were made by the therapists.(03 sticks) 02(wheel chairs) appliances were distributed.

ACTIVITY NO 3.

Parents Counseling/ meeting

It is extremely important that we organize one parents meeting once a month wherein all the problems are discussed and solutions found. Sometimes it so happens that the problem is inter-related and so is the answer. These meetings reduce the stress /depression felt by the parents/staff in the process of bringing up these children. Parents also reveal their success stories resulting out of these counseling and these discussions act as a feed back to us which gives us the next step to be organized for the particular child in conversation. In 2019-2020 a total of _08_ meetings took place.

Parents are given bus fare from their homes and back. Food, Refreshments and tea are served on all meetings. This year most of parents and guardian meetings were conducted by our staff at the door steps of child along with four to five parents turn wise in centre keeping in view of the guidelines suggested by administration.

Parents meeting in home and day care centre and through

Google meet

ACTIVITY NO 4.

Vocational Exposures

After introducing this activity in the year 2010 in the field of candle making, stitching, making of sweet boxes, paper bags, pickle making , painting, greeting cards making etc and after we had send these to the Ministry of Social Justice and Empowerment and we have a place reserved in the Delhi Haat for our artifacts to be displayed. Each child goes through a similar procedure or identifying his/her interest to choose a vocation and believe us this process takes a really long time, but after we finally select a vocation to a certain child we stick to improving it in a very slow manner so that the process is thoroughly understood by the beneficiary and he /she makes it his/her ultimate habit. Some of our friends have now converted these vocational educations into small professions. This year, we try to emphasis on home based activities in rural set up, so that child can assist their parents /guardians in day to day activities.

Under the supervision of care givers

ACTIVITY NO 5.

Yoga Camps.

Yoga helps in making the body system work to its optimum and the mind concentrated for the desired daily activity. Our special educators, during their training, are taught certain asana's applicable to our special children and the same is delivered to the children while making home visits. The same is also practiced at the day care center but only after accessing the child's strength and capability so that no harm comes to the child. This year we were unable to arrange for a yoga teacher because of its non-availability, therefore our special educators performed as yoga teachers.

Yoga and meditation

Besides the usual therapy exercises the parents are also satisfied with certain yogic postures meant for their child only and we hear so many success stories as the child eases his body/ mind tensions and becomes more concentrated in other skills.

In the end session of 2016 we had introduced the “Art of Living” session of Sri Sri Ravi Shankar just on a trial basis but in 2017-2018 it became a real popular aspect with our special needs and normal students kept for inclusion . This concept became so popular in the student circle that these students visit our day centre and teach the special needs children and adults some of the exercises applicable to them.

still we are practice of yoga in 2020-21 it is one of the most popular of our activities.

ACTIVITY NO 6.

Excursions/Tours.

This year we were able to take our children to excursion or tour to nearby places because of certain financial constraints. Nevertheless we shall this part of activity this year as the focus here is to learn through entertainment. Being a monthly program the special child loves to get out of the usual teaching and learning program and visit places like Shimla/Chandigarh /solon or a picnic with other normal school children in nearby places We also make it a point to take the children to the industrial units and show them how the factory machines function.

ACTIVITY NO 7.

Sports and Co-curricular activities.

For this activity we have a sports ground near to our office in Kunihar which is also a Govt. school. The desired children are taken, sometimes accompanied by a special coach, and taught the games meant to be played at Special Olympics. In the present year 2020-21, National Games were held at, Sonipat (HR) from wherein two of our participants namely Ms. Riya and Mr. Lekh raj in Hand-Ball begged silver medal organized between 15th Nov. to 20th 2020. These two athletes have selected among probable athletes for coming summer world Special Olympics also . In state level two of our participants won Gold in 200 meters and the other

won silver in 400 meters race. Lastly in, State trial games were held under Deptt. Of youth and sports here five of our special children were selected to the state games as this was only a trial game competition...**Painting, Poster and Greeting cards** are made by PWD's who have some inclination towards art.

Participants in state level virtual basketball competition in which we got first, third position among boys and second in girls all over the state.

In this year 2020-21 the special winter Olympic Games were held in Narkanda. Wherein Mr Awnish, an athlete from Ganpati won a silver and one bronze medal in ALPINE SKY. There is a possibility that Awnish might go in for international disability games, next year.

We participated virtually in district level world disability Day held in Solan ,presided by DC solan , our children more than ten , participated in sports, culture and Painting etc. DC Solan also appreciated our efforts in field of disability. Our five of children participated in different activities including sports.

ACTIVITY NO 08.

Admissions to Government Schools

In the year 2020-2021 our NGO successfully admitted __01__ Persons with Disabilities to government school.

ACTIVITY NO 09.

LLC.

We are the LLC (Local Level Committee) NGO under National Trust wherein the Deputy Commissioner is the Chair person. After the age of 18 the PWD or CWSN has to be given legal

protection in terms of land holdings, bank accounts, pensions etc. The beneficiary is named a legal guardian who is answerable to protect the legal rights of the same. Earlier it so happened that the pensions which came into the account of the beneficiaries were not delivered to them which is also the reasons we see so many Pwd's and Cwsn's on the roads begging for survival. As per law our friends also have the right to land holdings and are divided amongst other brother and sisters, but unfortunately our friends are deprived and they are absolutely unaware of how the law goes, therefore in order to protect their fundamental rights this act of LLC comes into force. Further in our duties we have to revive the old cases and see that the protection given to the beneficiary is maintained and any legal matter arising thereof is solved through a lawyer. This year in 2020-21 a total number of (36) beneficiaries were given the LLC coverage and another (25) reviewed.

ACTIVITY NO 10.

M/R Certification and trainings to staff .

During the year 2020-2021 CRC Sunder Nagar, invited our staff on different occasions for training purposes on different issues like RTI, Blindness and Hearing and Speech mental health and cerebral palsy etc. Our staffs were given training certificates for the same this year, these training are conducted virtually.

Ganpati is motivating and counseling peoples for Medical Certification /assessment of children with signs of disability for government District civil hospitals ,where the facility of medical certification is providing along with UDID cards with the help of Medical Department, Welfare Department and local authorities for the purpose of medical certification wherein 21 persons with disabilities were identified and certified. We are also motivating the PWDs for govt. schemes central and state both.

Activity no. 11:

Medicine for epileptic children and medical checkup.

Our Ngo is providing free epileptic medicine for eight children every month since 2016. We are also providing other common medicine on prescription of concerned specialist in Government hospitals.

ACTIVITY NO 12..

IGNOU STUDY CENTRE.

After initiating this educational program in the year 2010 we learned that its need is more than we could anticipate. Children who are living in far flung areas and have nil or very little access to government institutions but IGNOU has made this dream possible for not even young children but also adults who wish to do more than they have already done through this distant educating program by the government.

We have about 40 gram panchayats of three assembly constituencies to be covered.

We conduct regular classes on all Sundays for students who find the study material difficult to understand.

One of our NGO's objectives is to re-habilitate the rural youth and here we do not charge any additional service charges from the student's rather free counseling and education tips are given to

One and all. Similar kind of education comes through **SOS**, State Open Schooling and **NIOS**, National Institute of Open Schooling. For 10th and 12th grade students especially for girl students who normally do not complete their education after 8th standard and get busy in their household activities, to which too we are affiliated.

On similar grounds we are considering opening a sewing training program for at least 50 girls with the help of government funded programs to give them a vocational hand required in future.

We have now the honor of a "Special Study Center" given to us by IGNOU and Dr.Roshan Lal Sharma has been nominated as the coordinator, IGNOU. Dr. Sharma gives priority to girl students of SC/ST classes to become more educated because in future these girls are to handle the house hold income/expenditure accounts as well as support their family income in case of any necessity arising . Therefore education of these girls is extremely important and mandatory.

Now in this session of 2020-21 we had an occupancy of 90 per cent participation at the IGNOU INDUCTION MEETING, which by normal standards is fair enough.

ACTIVITY NO 13.

CELEBRATIONS.

in this very year due to covid -19 ,due to restrictions we could not organize physically big activites for children , we fucssed only on virtual .

There were NIL international visits by any of our staff or board members.

ACTIVITY NO 14.

Seminars and Meetings.

As ours is an **LLC (Local Level Committee)** NGO under **National Trust** and the **Chair Person** is The **Deputy Commissioner of Solan**, there were four meetings held in order to see to smooth functioning of the committee and solutions are decided to any problems arising thereto. This year four meetings were held. All these meetings were attended by our Director, Dr.Roshan Lal Sharma.

In addition ,one of our staff member attended various meetings organized by various stake holders virtually ,on numerous issues Meeting organized by our National Trust, Disaster management , CRC, other national level institutions on all aspects of persons with disability , educations policies , vocational and skill development ,impacts of covid-19 participated and discussed at length . The projects presented by the National Trust were also a matter of discussion as those applicable to plain cities are difficult for hilly areas. The difficulties faced during working in the hills was a matter of concern and time consuming.

ACTIVITY NO 15.

Pragati Industrial Training Institute (Electrician Trade under NCVT) (Stitching and Tailoring)

This Industrial Training Institute with a not – for – profit motive in mind and working under the guide lines of Ganpati Educational Society also stands as a sister organization to Ganpati as it is governed by the same board of members .it came into existence in the year 2004 at Kheri road in Rajgarh town of district Sirmour, H.P. India. ITI is affiliated to Directorate Tech. Education Sunder Nagar and Min. of skill development and entrepreneurship Govt. of India in 2008. The sole aim of this institution is to provide skill based and short term courses under MHRD, Government of India., to candidates living in far flung and geographically & economically backward areas. We have an infrastructure capable of handling 50 students per session and all the required facilities are being provided to the students in both the concerned courses.

Almost all the students passing out have been well placed either in good companies or have opened their own small business setups in surrounding areas.

The girls also have been successful in operating their own stitching and tailoring shops and then further give employment to other fresh candidates. So overall this institute has been a thorough success in terms of the vision, mission, and objectives of Ganpati Educational Society.

As long as we continue to get better results for the small deeds we perform for the betterment of human kind, we shall never stop trying.

Thank You., One and All.
