PRESIDENT DESK

The thought behind "Navchetna Special School" was independency in the lives of differently able ...thought to

make a better and secure place in the society where differently-able can live free with minimum barriers and maximum acceptance. At National Institute of mentally handicapped, Delhi we as students, were dealing with poor families coming from every corners of the country with pain in their hearts and burdens in their hands, they shared and pent up their emotions with heartfelt stories. They were helpless for their kids. This gave us an inspiration to work for these helpless kids, so that they (Disables) can achieve independency in every aspect of their life. It was the initiative by Navchetna that after a successful workshop in Hoshiarpur, we opened special school to facilitate services to every kind of condition or disability and on 5th of September'2011, with three kids and three professionals we started our school. It is a very mesmerized moment for us.

Now it's been Seven years and still our journey continues striving for disabled friendly society. Today we have more than 50 students with us and an enthusiastic group of professionals. I foresee that in upcoming years Navchetna is growing higher and influencing the society positively towards creating a barrier free society for Children with Special Needs.

ABOUT ORGANIZATION

“Each and every child is born with a desire to strive to be the best person possible both physically and mentally. The child has the urge to do what he/she is best fitted to do, to be happy and well adjusted. To be so the child must be given an opportunity to fulfill the urge.”

With this view, we decided to bring a positive change in the society to bring happiness and a new hope in the life of “DIFFERENTLY ABLED PEOPLE.” Hence, with the aim to “BRING THE POSITIVE ATTITUDE TOWARDS THE CHALLENGES OF THE CHALLENGED”, our organization, NAVCHETNA, has been working voluntarily for the children with special needs for last 5 years in the project of CBR, i.e., community based rehabilitation, Special School and Clinical Services at hoshiarpur.

Navchetna is an organization working for people who are labeled as “disabled” in the society. But Navchetna's outlook for these special people is different; we call them “differently-able”.

This spotlight on Navchetna is to draw your auspicious attention towards our objectives, vision and efforts that our people do with whole hearted devotion to bring new, hopeful and a good change in the society and thus positively influencing the life of people with different abilities. Navchetna is derived from its root Hindi word “nav” means new and “chetna” means conscience.

Navchetna provides a supportive roof to differently-able children (in the age group of 6 months-18 years), under which they are nurtured and trained effectively so that they can lead an independent and better life in future. Our organization works as special school as well as clinical center. We work as a team to focus on quality, positive outcomes, improvement, building trust and strong relationship. We focus on the **HOLISTIC DEVELOPMENT** of the child.
